**Statement from Tim Worner, CEO of Seven West Media**

Any claims by the AFP that they uncovered any relevant documents as part of their raid on Seven West Media and its premises are false.

The document given to them by Seven during their visit on Tuesday was not covered by or requested in the previous production order. A massive amount of public time and money was wasted on something that could have been requested by email.

In any event the document had no legal effect as it is an unsigned draft which was never finalised.

The production order only sought actual agreements. 34 armed personnel were required to correct a drafting error in a massive over reaction. AFP believed what they read in the papers and are no doubt shocked to discover the truth.
